

Gameplay Overview

Starship Horizons Bridge Simulator is a cooperative crew experience. Best experienced with 4-6 players, the host will launch Horizons and select a mission. The players will choose their roles from the [Station Selection Screen](#).

Each role performs complementary tasks to other roles. The [Flight](#) officer controls the movement of the Horizons in space, while the [Tactical](#) officer controls the weapon systems, and the [Sciences](#) officer scans the area getting information. The [Communications](#) officer sends and receives messages to other ships and monitors objectives. The [Engineering](#) officer maintains systems offering critical boosts and repairs. The [Captain](#) coordinates all of the information and makes decisions and orders for the other officers to carry out. The players work together using their stations and communicating with one another to complete mission objectives and thus the mission.

Work in Progress

- Launching a mission
- Main View Screen
- Selecting stations
- Working together
- Completing a mission
